

Educational Breakfast

Topic: *Industry Trends and Technologies Driving the Future of Program and Portfolio Management*

Speaker: Tad Haas, Senior Product Manager, Microsoft Enterprise Project and Portfolio Management (EPM) Solution

Date: Thursday, May 14 **Time:** 8 – 11 AM (doors open at 7:30AM)

Presentation Abstract:

Industry Trends and Technologies Driving the Future of Program and Portfolio Management

What are the trends that are driving the development of program and portfolio management practices in industry and business? What technologies are being developed to support program and portfolio management? How will these trends and technologies impact how organizations manage their programs and portfolios in the future?

Tad Haas will present a global and cross-industry perspective of key trends and technologies that are influencing and enabling how organizations manage their programs and portfolios. He will also facilitate a breakout session for participants to discuss and explore the factors and issues that are impacting how they manage their programs and portfolios.

- Project, Program and Portfolio Management
- Current and upcoming technology
- Business Intelligence

Speaker Bio:

Tad Haas is a Sr. Product Manager for Microsoft. As part of the Information Worker Product Marketing Group he focuses on the enterprise project and portfolio management solution - EPM. Tad brings 20 years of PM industry, technology and business development experience to the role. Before joining Microsoft as a Solution Specialist, he held various leadership and contributor positions with Artemis, Primavera, and other EPM start-ups.

Tad has been presented to the PMO Forum, PMI College of Performance Measurement, METAmorphosis, Project World events and PMI National Symposiums, and other international events. Tad has been an active participant in the Project Management Institute (PMI) community since 1987. He has held board positions in the Colorado, Minnesota and Houston Chapters.

He has helped many organizations evaluate and implement enterprise project management solutions – focusing on the supporting software technologies that facilitate communication, collaboration and execution of project selection and performance. As a product and business development manager, he has helped launch or influence many popular planning and management products.
